This is a fantastic revival of an great old game. I had a blast trying to save europe from the ravages of WW2, as well as my career! Otherwise I hadnt noticed any bugs, and all appears to be working well. Thank you for bringing this classic to steam and a modern platform :-D May it work forever now!!. I've played a lot of Freecell on my mobile phone so It's become pretty easy for me to figure out even harder puzzles so far. I see many reviews mention that it is too hard and tedious even using magic. I disagree and have made it to almost half way through the game in 10 hrs and have rarely had to use magic spells. It has crashed on me a couple of times so far too. Haven't seen the stuck stack glitch yet.

That said, I still would only recommend this to those that actually enjoy solitaire games, and number puzzles, logic puzzles, things like that.. I LOVE IT !!!!

It is so interesting to take control over huge amount of ships, make missions and do whatever you want with them.

Cons :

1# when you make mission/free roam and add too many vessels to play with, you will not be able to select them because icons are out of screen.

I recommend add slider menu with ships to select :)

2# I can't join any multiplayer servers and find any :(

. mejorando bastante. 10/10. Super cute game about pugs and one of my all time favourites!! :PugLove:

The good???

??Gameplay: It's an eternal runner. I'd say the difficulty is average/hard but fair, as in, when you lose you know why you died. You can also unlock more characters that control differently using the pug coins you collect.

??Controls: can be played on keyboard or mouse without problems, as you only need to hit space bar/click to jump.

??Graphics: I think this is where the game truly shines. The pixel art is amazing, especially the characters sprites. It's also the most polished and pretty than in the previous games. The levels look much better and more varied too.

??Music: I would say it's good, fits well with the game.

??Duration: It depends on your goals but as most runners the duration can be stretched as much as you want. It took me 3h to unlock all characters, but I didn't tried to beat the 1# highscore on the leader board, or get all the trophies, etc.

I think it's extremely good for its asking price and offers a lot. You can always wait for a sale (where it is super cheap) if you're hesitant.

The bad???

??No Online Mode: it used to be a feature but got taken off due to people using programs to cheat on the learderboards and change scores.

??Trophies: with online mode taken off, it's impossible to get 100% completion because there's one trophy that requires you to play on-line, so Achievement Hunters be warned. All the other trophies can be obtained without any issues though.. Starts out fairly intriguing with a big open map, but quickly turns into the most god-awful buggy, finnick, messy gameplay possible as you are tasked with pushing a giant ball around by shooting it. I have not been able to finish it because of bugs (most often the ball falling through surfaces and out of the accessible world). Skip it.. Best game of all time 11/10.. This is the perfect football sim for people who prefer strategy to spectacle. Incredibly detailed, deep, and immersive. You can micromanage your team right down to the playbook and game plan, or sit back and make roster decisions only, or anything in between. If you're looking for state-of-the-arts graphics (or any graphics really) this game is not that and it does not try to be. It is a football sim, pure and

simple, and a great one. 9/10

Der C64 Klassiker schlecht hin in neuem look. Für Fans ein muss ;). Resurgence: Earth United is a refreshing take on Endless Wave Arena style games.

The game is still new in development, but shows promising amounts of "unauthorized" content area for future updates! I would love if there were more achievements, but regardless you can spend hours playing this game either competing for the Highscore or for fun with a group of friends. I expect big things and can't wait for the next update!

I would definitely recommended it to both casual and competitive gamers alike!. I am here for the cow murder.
Can you please add exploding animal to every map?
I am 100% down for a car wreck'em game where you get to explode the animals.
Great work.

<https://youtu.be/VJ2ID2fKuTEY>. Cute, funny, and fun.. A good time killer! You have to save your cursor being attacked by several lines.. I am recommending this game, but there's one thing that I dislike you start out for a long time with a flashlight. I was hoping that I would be shootin raptors and other dinosaurs but for about 20 minutes,your pointing a flashlight at a playdo looking raptor.. I feel with time this game will develop into a fun arcade style RVC racer. However, if you are after a simulator to practise RVC skills stick with VRC Pro. The physics in this game are not realistic (yet?).
